

Manhattan
STONE AND TILE

2018 Product Guide

About us

Manhattan Stone and Tile is dedicated to providing the best in custom concrete, stone, and drain solutions. Each material group can be designed and tailored specifically to your project. We recognize that creating something great requires great material. Our goal is to provide you the most control and customization possible regarding the color, shape, texture, and overall appearance of our concrete and stone products. We give you the freedom to alter and design our products so they can facilitate your design goals. The images and products in this catalogue provide all the pieces you need to create a truly unique material for your design endeavors.

Shapes & Sizes

Shape determines pattern and allows for creative designs, mixture of materials, and individual expression. Our collection of two-dimensional shapes can be used in both stone and concrete applications. Although our standard collection of shapes come in specific sizes you are not limited to what is presented here. If you are interested in an original shape or an unlisted size we are happy to work with you in creating a custom pattern or piece.

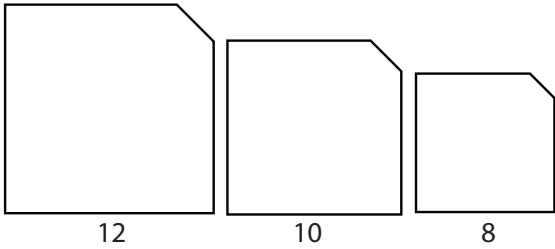

Some shapes are not available in every type of material we carry. Before settling on a purchase be sure to confirm that your desired material is available in the dimensions and design you are interested in. Custom shapes are possible on a case-by-case basis. For specific questions regarding custom forms contact us.

Concrete

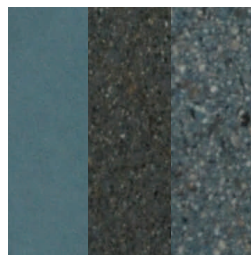

The Origins Collection

Concrete is a highly customizable material that provides nearly limitless design opportunities. You are given the opportunity to create your own unique material by altering specific factors including color, shape, finish, and glass. Our extensive collection of colors in combination with other design factors gives you a vast world of unique concrete materials that you can cater to your own projects. If you are interested in matching a specific color or creating your own custom color we are happy to work with you in the creation process.

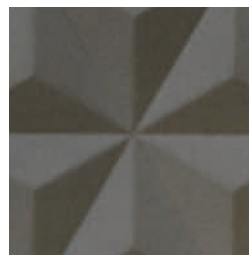

Our Classic Series and Architectural Series of concrete have unique attributes that lend themselves better to specific applications. While Classic concrete is best for common use, Architectural concrete provides greater resiliency and depth of color. Explore the following sections to see the impressive range of customization available to both concrete categories.

Domestic Stone

The Exploration Collection

Our selection of domestic stone is available in a wide range of colors, tones and finishes. You are in control of the shape, color, and size. This means that we can produce domestic stone materials to perfectly suit your specific design needs. As with all natural products, variation in tone is to be expected and celebrated. Regardless if you intend to utilize stone in an exterior environment at a larger scale or for an interior space with delicate shaping we can produce stone that is right for you. Our standard selection of sizes allows for more expedited delivery and production. Custom shapes and certain larger sizes require a longer production period. Our custom stone products can be used in a wide range of applications including veneer, tile, and slabs. This gives you the opportunity to incorporate stone throughout your design projects.

Colors

Finishes

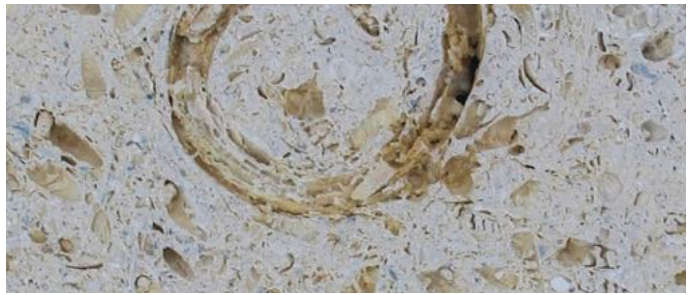

Profiles

Variation in texture, color, and marbling should be expected when purchasing natural stone. Before ordering domestic stone, be sure to request a sample of the chosen color and finish to confirm your selection.

Non Domestic Stone

The Outreach Collection

Few materials are as impressive or engaging as non domestic stone. Natural patterns and fluidity found within these products exhibit beautiful variations of color and marbling that can be incorporated into many different designs. Our broad selection of colors provides an impressive pallet of tones, texture, and natural patterns to choose from. Although these materials are typically utilized for tile applications, a portion of our collection can be employed in different areas. Some uses to consider are custom tiles, backsplashes, or mosaics.

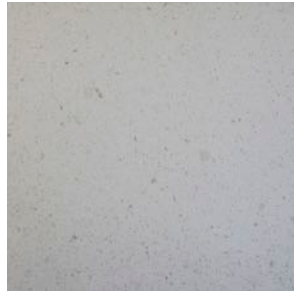

Colors

Non-domestic stone contains variation in color and may exhibit notable differences in pattern and marbling. Non-domestic stone samples are as representative as possible but there will always be variance present in natural stone products. If your desired material is not listed with the appropriate finish, contact us about finish availability for specific colors.

Waterjet

The Advancement Collection

Our water jet process gives you the opportunity to create stunning and intricate designs using almost any of our materials. Our process allows for the creation of unique designs using domestic stone, non domestic stone, concrete, or a combination of your choosing. Because you are able to customize the materials themselves in addition to selecting from a large selection of patterns and shapes, you are assured a unique creation that fulfills your design needs.

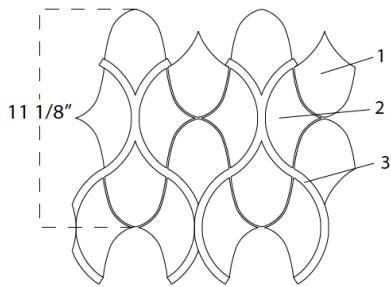

Patterns

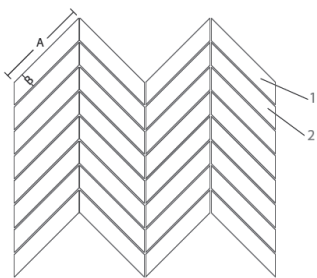

Gallery

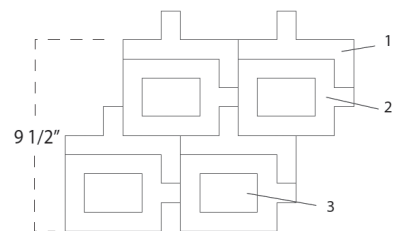

Depending on the material selected, water jet designs may exhibit unexpected textures and/or colors. It is best to purchase a small-scale sample before committing to a larger order.

Drains

Signature Series | Infinity Series

Exceptionally designed drains can provide the perfect touch to an exterior project. We carry the Art Deco Drains' Signature Series of modern and traditional drains. These quality products provide a classic finish to any project. Our drains are available in either stainless steel or brass and can be produced in both square and round formats. Regardless if your design requires a form that is sleek and modern, embellished and traditional, or any style in between, we have a design that will suit your project.

Signature

Infinity

The Art Deco Drains line of products comes with the chosen grate(s) and the appropriate body for the design. Installation of the product is the responsibility of the purchaser.
